

2.135" Diameter 2 Liter Fluid Sampler

Description: Fluid samples from deep boreholes can provide insights into the subsurface physical, chemical, and biological conditions. Recovery of intact, subsurface fluids is required to analyze aqueous chemistry. The 2.135" Diameter Fluid Sampler descends into the borehole, and the sample is returned to the surface for lab analysis.

Diameter: 2.135"

Length: 82"

Housing: Stainless Steel

Weight: 32 Lbs.

Temperature Rating: 250 degrees F

Pressure Rating: 5000 PSI
