

*Description: Consist of absolute temperature in either degress Fahrenheit or Celsius. A calculated differential measurement is also provided. Excellent for detecting vertical fluid movement in borehole or cased well. Used for correcting other sensors that are influenced by high temperatures. Often presented in conjunction with production logs.*

Diameter: 1.25"

Length: 30.375"

Weight: 6 Lbs.

Max Temperature Rating: 500° F (260.0° C)

Pressure Rating: 18,000 Psi (124 Mpa)

Operating Voltage: 120 Vdc, Positive Operating Current:

45 Ma

Response Time: Less Than 2 Sec.

Logging Speed: 20 ft/min.
