

1.38" Diameter 460 Milliliter Fluid Sampler

Description: Fluid samples from deep boreholes can provide insights into the subsurface physical, chemical, and biological conditions. The 1.38" Diameter Fluid Sampler descends into the borehole, and the 460-milliliter sample is returned to the surface for lab analysis.

Diameter: 1.38"

Length: Variable

Housing: Stainless Steel

Weight: Variable

Temperature Rating: 250 F degrees

Pressure Rating: 1800 PSI
