

3-Inch Spinner/Flowmeter Impeller

Description: The 3-inch impeller flowmeter's spinner measures fluid flow rate by sensing the speed of a rotating impeller. As fluid flows through the impeller blades, they turn, and the rotation speed is recorded and converted into a flow rate measurement. This allows for the quantification of fluid flow in various applications.

Diameter: 3"

Length: 26.8"

Weight: 8 Lbs

Temperature Rating: 350°F

Casing Range: $\geq 4"$

Pressure: 15,000 psi

Threshold (typical): $<1.0\text{ft/min}$

Flow Measure point: 4"
